Digital Resources

Most products in ERAC’s BC Digital Classroom Core Collection have extensive information about First Nations, or topics relevant for connecting to Aboriginal Worldviews and Perspectives. (For best results use Advanced Search and BOOLEAN searching such as ‘NOT Australia’ to remove references to Australian Aboriginal information.) À la carte resources provide extensive supplemental material from different perspectives including hundreds of relevant videos of varying lengths (many in French).
The Aboriginal Collection

BC’s redesigned curriculum is grounded in current child development and learning theories research, including a large body of research that supports the inclusion of Aboriginal content for all students.

To assist with this inclusion of Aboriginal Knowledge and worldviews into the curriculum, ERAC is continuously identifying and evaluating aboriginal resources. These resources encompass all grade levels and a variety of genres. In addition, wherever possible, resources identified as authentic have been vetted using the following criteria:

- present authentic First Peoples voices (i.e., are created by First Peoples or through the substantial contributions of First Peoples) and depict themes and issues that are important within First Peoples cultures;
- incorporate First Peoples story-telling techniques and features as applicable

As always, before using a resource educators should pre-read the resource and carefully consider the content in light of their own school community.

Resources in the ERAC collection which are considered authentic aboriginal resources are identified with the turtle icon. These are resources where at least one member of the evaluator pair was appointed as an aboriginal evaluator.
